

I am an XM listener and have been for a year now. I listen to sports, news, music, and most recently, have enjoyed the traffic and weather channel for the Bay Area. Seeing as I pay \$10 a month for XM, I expect to have the same and more of what I get from local radio. Rather than trying to limit XM's ability to offer a good product, why don't you spend the time looking at how local radio could be improved? There's a reason why over 1MM Americans are now PAYING for their radio. Pay attention!
